

**US STEEL**  
**Great Lakes Works Complex**

**On Line Contractor Safety Training**

Effective **August 4, 2014** Contractors will no longer have to attend the on-site Annual Contractor Safety Training at US Steel Great Lakes Works. They will be able to log in from any desk top, laptop, notebook, or Smartphone and view the training video by assessing this link <http://ussgreatlakes.mtssafety.com> If you are a new user or your training has lapsed you will have the option to register. All contractors who have received training prior to August 4, 2014 will be in the MTS data base for verification purposes.

Once the video is viewed there will be a 10 question test that must be passed by getting 8 or more correct. Each contractor employee will have 2 attempts to do this or the video will have to be viewed again. When the test has been passed a certificate will be available to print.

Pass Control will verify training completion upon badge activation. If Pass Control informs a contractor employee that they do not have any verification information, the contractor employee must contact their supervisor for further inquiry.
